Part	See Page
I - Navigation and Processes	ii
II - Life Cycles and Methodologies	vi
III - Document Templates and Guidelines	xi
IV - Glossaries and References	xvi

Part I - Navigation and Processes

Volumes I & II	SDLC Handbook Introduction and Tailoring	I-1-1
Chapter 1		
	Section A: SDLC Handbook Organization and Processes	I-1-2
	SDLC Handbook Organization	I-1-3
	SDLC Handbook Conventions	I-1-8
	SDLC Handbook and Process Change Procedure	I-1-11
	Section B: Basic Principles and Standards	I-1-17
	SDLC Principles	I-1-18
	Policies and Standards	I-1-20
	Functional Impact Areas	I-1-25
	Section C: Tailoring Guidelines	I-1-27
	Documentation	I-1-28
	Project Size	I-1-30
	Life Cycle Tailoring	I-1-32
	Methodologies	I-1-33
	Tailoring Security Deliverables	I-1-34
Volumes I & II	Process/Role Navigation	I-2-1
Chapter 2		
	Section A: Process Summary	I-2-2
	Quick Reference Process List	I-2-4
	Planning Processes	I-2-6
	Management Control Processes	I-2-16
	Development Processes	I-2-36
	Post-Development Processes	I-2-51
	Section B: Teams and Roles	I-2-58
	Standing Teams	I-2-60
	Project-Specific Role Definitions	I-2-65
	Project Specific Teams	I-2-70
	Project Specific Teams vs. Roles Cross-Reference Table	I-2-76

Part I - Navigation and Processes, Continued

Volume I Chapter 3	Project Control Processes	I-3-1
	Section A: Project Planning	I-3-2
	Project Plan Definition	I-3-4
	Estimate	I-3-6
	Produce Schedule	I-3-7
	Identify and Assess Risks	I-3-8
	Negotiate and Document	I-3-9
	Section B: Quality Assurance (QA)	I-3-12
	Project Responsibility	I-3-13
	Table 3-1. Quality Assurance Activities Summary by SDLC Phase	I-3-14
	Project QA	I-3-15
	Independent QA	I-3-17
	Testing	I-3-18
	Section C: Technical Reviews	I-3-19
	Technical Review Objectives and Benefits	I-3-20
	Types of Reviews	I-3-21
	Work Product Review/Acceptance	I-3-25
	Informal Internal Reviews	I-3-28
	Formal Inspections and Peer Reviews	I-3-31
	Section D: Configuration Management (CM)	I-3-35
	Definitions	I-3-36
	Goals and Functions	I-3-37
	CM Responsibilities	I-3-38
	Configuration Management and Control Mechanisms	I-3-40
	Section E: Requirements Change Control/Impact Analysis	I-3-41
	Background	I-3-42
	Change Control Board Description	I-3-43
	Requirements Change Control/Impact Analysis Process	I-3-45

Continued on next page

Part I - Navigation and Processes, Continued

Volume I Chapter 4	Project Oversight Processes	I-4-1
	Section A: Overview of Management Control Processes	I-4-2
	Process Description	I-4-3
	Purpose and Benefits	I-4-4
	Process and Activity Flow Diagrams	I-4-5
	Management Control Process Overview	I-4-7
	Section B: Project Metrics	I-4-12
	Purpose and Benefits	I-4-13
	Measurement Concepts	I-4-14
	Required Core Indicators	I-4-17
	Measurement Analysis	I-4-18
	Displaying and Reporting Indicators	I-4-24
	Section C: Management Reviews/Oversight	I-4-25
	Senior Management Reviews	I-4-26
	Project Status Meetings	I-4-30
	Reporting Across OIT Organizations	I-4-35
	Section D: Meetings, Issues, and Action Item Tracking	I-4-40
	Section E: Revising/Rebaselining the Project Plan	I-4-45
	Comparison and Definition	I-4-46
	Revising/Rebaselining the Project Plan Process	I-4-48
 Volume I Chapter 5	 Risk Management Processes	I-5-1
	Section A: Risk Management Concepts	I-5-4
	What Is A Risk	I-5-5
	Sources of Risk	I-5-6
	Quantifying Risks	I-5-8
	Prioritizing Risks	I-5-11
	Risk Reduction Strategies	I-5-13
	Section B: Project Risk Management Overview	I-5-15

Continued on next page

Part I - Navigation and Processes, Continued

Volume I	Section C: Communicate/Document Project Risk	I-5-21
Chapter 5	Risk Communication	I-5-23
(continued)	Project Risk Management Plan	I-5-23
	Risk Management Strategy/Approaches	I-5-24
	Project Risk Communication/Documentation Process	I-5-25
	Section D: Identify Project Risks	I-5-27
	Techniques for Risk Identification	I-5-28
	Identify Project Risks Process	I-5-31
	Section E: Assess and Prioritize Risks	I-5-35
	Definitions	I-5-36
	Compound Risks	I-5-37
	Assess and Prioritize Risks Process	I-5-38
	Section F: Plan Risk Mitigation	I-5-42
	Background	I-5-43
	Plan Risk Mitigation Process	I-5-45
	Section G: Monitor Project Risks	I-5-49
	Risk Tracking	I-5-50
	Control	I-5-52
	Monitor Project Risks Process	I-5-54

Part II - Life Cycles and Methodologies

Volume I Chapter 6	Project Initiation	I-6-1
	Section A: Investment Management Process (IMP) for Project Selection	I-6-3
	Roles and Responsibilities	I-6-4
	Select Process Overview	I-6-5
	Dollar Thresholds	I-6-7
	Section B: Deliverables and Associated Documents	I-6-8
	Project Initiation Team Formation	I-6-9
	IT Funding Request Worksheet	I-6-10
	Project Plan	I-6-12
	Cost/Benefit Analysis	I-6-13
	User Requirements	I-6-14
 Volume II Chapter 7	 Traditional Waterfall Life Cycle	II-7-1
	Section A: Life Cycle Overview	II-7-3
	Life Cycle Phases	II-7-4
	Advantages of the Waterfall Life Cycle Model	II-7-9
	Disadvantages	II-7-10
	Section B: Project Definition	II-7-11
	Functional Requirements	II-7-13
	Requirements Certification/Baseline	II-7-16
	Data Management Plan	II-7-17
	Security Deliverables	II-7-18
	Training Plan	II-7-22
	System Test Plan	II-7-24
	Quality Assurance Plan	II-7-26
	Configuration Management Plan	II-7-29
	Definition Phase Completion Review	II-7-31
	Section C: System Design	II-7-34
	Design System	II-7-35
	Update Test Plans	II-7-36
	Critical Design Review	II-7-37

Continued on next page

Part II - Life Cycles and Methodologies, Continued

Volume II	Section D: Programming or Construction	II-7-40
Chapter 7	Establish Development Environment	II-7-41
(continued)	Create or Modify Programs	II-7-42
	Conduct Unit and Integration Testing	II-7-43
	Prepare Operator's Manual	II-7-44
	Migration Turnover/Test Readiness Review	II-7-45
	Section E: Acceptance	II-7-49
	Submit Developed Software for Testing	II-7-50
	System Acceptance Testing	II-7-52
	Security Testing	II-7-54
	Security Certification Package	II-7-55
	User Documentation and Training Materials	II-7-57
	Conduct User Acceptance Testing	II-7-58
	Deployment Readiness Review	II-7-59
	Section F: Implementation or Transition	II-7-62
	Determine Acceptable Level of Operational Risk	II-7-63
	Train Users	II-7-64
	Implement Developed Software	II-7-65
	Document Lessons Learned	II-7-68
	Operational Readiness Review	II-7-70
	Section G: Operation or Production	II-7-73
	Monitor Performance	II-7-74
	Assure Continuity of Operations	II-7-75
	Section H: Evaluation	II-7-78
	Evaluate Project	II-7-79
	Conduct System Reviews	II-7-82
	Evaluate Disaster Recovery/Contingency Plan	II-7-86
	Perform Recurring Accreditation	II-7-87

Continued on next page

Part II - Life Cycles and Methodologies, Continued

Volume II Chapter 8	Incremental Life Cycle	II-8-1
	Life Cycle Overview	II-8-2
	Advantages and Disadvantages	II-8-4
	Project Initiation	II-8-5
	Release Definition	II-8-7
	Release Design, Programming and Acceptance	II-8-8
	Release Implementation, Operation and Evaluation	II-8-9
 Volume II Chapter 9	 Information Engineering Life Cycle	 II-9-1
	Section A: Information Engineering Overview	II-9-2
	Information Engineering Life Cycle	II-9-4
	Benefits of Information Engineering	II-9-7
	Disadvantages	II-9-9
	Section B: Information Strategy Planning (ISP)	II-9-10
	Information Strategy Planning Architectures	II-9-11
	Information Strategy Planning Tasks	II-9-12
	Information Strategy Planning Deliverables	II-9-14
	Section C: Business Area Analysis (BAA)	II-9-16
	Business Area Analysis Tasks	II-9-18
	Business Area Analysis Deliverables	II-9-20
	Section D: Business System Design (BSD)	II-9-21
	Business System Design Tasks	II-9-23
	Business System Design Deliverables	II-9-25
	Section E: Technical Design (TD)	II-9-27
	Technical Design Tasks	II-9-28
	Technical Design Deliverables	II-9-30
	Section F: After Technical Design	II-9-32
	Programming or Construction	II-9-33
	Acceptance and Implementation or Transition	II-9-35
	Production and Evaluation	II-9-36

Continued on next page

Part II - Life Cycles and Methodologies, Continued

Volume II Chapter 10

Off-the-Shelf (COTS) Applications	II-10-1
Section A: Background	II-10-3
Definitions	II-10-4
COTS Advantages	II-10-8
COTS Issues	II-10-9
Section B: COTS Decision Process	II-10-14
COTS Decision Process Diagram	II-10-15
COTS Decision Process Key Activities	II-10-16
Section C: COTS Evaluation Process	II-10-19
Evaluation Process Overview	II-10-20
Roles and Responsibilities	II-10-21
Initial Activities	II-10-24
Requirements Evaluation	II-10-26
Domain Criteria Evaluation	II-10-29
Composite Scores	II-10-30
Section D: COTS Life Cycle	II-10-31
COTS Life Cycle Diagram	II-10-32
Differences from Traditional Life Cycles	II-10-33
Project Definition	II-10-35
System Design and Programming/Integration	II-10-36
Acceptance Testing	II-10-37
Implementation or Transition	II-10-39
Operation and Evaluation	II-10-41

Volume I Chapter 11

Development Methodologies	I-11-1
Section A: Prototyping	I-11-2
Overview	I-11-3
Benefits of Prototyping	I-11-5
Risks/Disadvantages of Prototyping	I-11-6
Life Cycle Considerations	I-11-8

Continued on next page

Part II - Life Cycles and Methodologies, Continued

Volume I	Section B: Joint Application Development (JAD)	I-11-9
Chapter 11	Overview	I-11-10
(continued)	Benefits of JAD	I-11-12
	Risks of JAD	I-11-13
	The JAD Process	I-11-14
	Life Cycle Considerations	I-11-18
	Section C: CASE Tools	I-11-20
	Overview	I-11-21
	Data Dictionaries	I-11-23
	Design Support	I-11-26
	Documentation Support	I-11-27
	Section D: Rapid Application Development (RAD)	I-11-28
	Overview	I-11-29
	Benefits of RAD	I-11-31
	Risks of RAD	I-11-33
	Life Cycle Considerations	I-11-34
	Section E: Object Oriented Technology	I-11-37
	Advantages and Disadvantages of OO	I-11-39
	Performance Risks	I-11-40
	Documentation Considerations	I-11-41
	Configuration Management Considerations	I-11-43

Part III - Document Templates and Guidelines

Volumes I & II	SDLC Deliverables Summary Tables	I-12-1
Chapter 12		
	Table 12-1 - Phase Summary	I-12-3
	Table 12-2 - SDLC Deliverables - Functional Team Responsibilities	I-12-8
	Table 12-3 - SDLC Deliverables - Create, Update/Revise, Finalize	I-12-12
	Table 12-4 - Information Engineering Deliverables	I-12-15
 Volume II		
Chapter 13	Planning Documents	II-13-1
	Section A: Deliverable Overviews	II-13-2
	Section B: Project Plan	II-13-4
	Project Plan Template	II-13-5
	Project Plan Guidelines	II-13-8
	Section C: Data Management Plan	II-13-27
	Data Management Plan Template	II-13-28
	Data Management Plan Guidelines	II-13-31
	Section D: Configuration Management Plan	II-13-51
	Configuration Management Plan Template	II-13-52
	Configuration Management Plan Guidelines	II-13-53
	Section E: Quality Assurance Plan	II-13-58
	Quality Assurance Plan Template	II-13-59
	Quality Assurance Plan Guidelines	II-13-61
	Section F: System Test Plan	II-13-66
	1.0 The Plan	II-13-67
	2.0 Resource Requirements	II-13-67
	3.0 Specifications and Evaluations	II-13-69
	4.0 Test Descriptions	II-13-70

Continued on next page

Part III - Document Templates and Guidelines, Continued

Volume II Chapter 13 (continued)	Section G: Training Plan	II-13-71
	1.0 Introduction	II-13-72
	2.0 Detailed Training Plan	II-13-73
	3.0 Training Design	II-13-74
	4.0 Training Media Options	II-13-75
	5.0 Curriculum Support Requirements	II-13-76
	6.0 Cost-Benefit	II-13-76
	7.0 Proposed Implementation Schedule	II-13-77
	8.0 Evaluation -- Planned Field Follow-Ups	II-13-78
	9.0 Detailed Deliverable Schedule	II-13-79
 Volume II Chapter 14	 Requirements Documents	II-14-1
	Section A: Deliverables Overviews	II-14-2
	Section B: User Requirements	II-14-4
	User Requirements Template	II-14-5
	User Requirements Guidelines	II-14-8
	Section C: Functional Requirements	II-14-17
	Functional Requirements Template	II-14-18
	Functional Requirements Guidelines	II-14-22
	Section D: Requirements Certification	II-14-37
	Section E: Requirements Checklists	II-14-38
 Volume II Chapter 15	 Security Deliverables	II-15-1
	Section A: Deliverable Overviews	II-15-3
	Document Descriptions	II-15-5
	Table 15-1. Security Deliverables, Create, Update, Revise Baseline by Phase	II-15-7
	Table 15-2. Prescribing Directives for Security Deliverables	II-15-9

Continued on next page

Part III - Document Templates and Guidelines, Continued

Volume II	Section B: Security Plan	II-15-13
Chapter 15	1.0 System Identification	II-15-15
(continued)	2.0 Sensitivity of Information	II-15-17
	3.0 Rules of Behavior	II-15-19
	4.0 Risk Management and Accreditation	II-15-20
	5.0 System Security Measures	II-15-20
	6.0 User Roles and Access Requirements	II-15-23
	7.0 Management Reports	II-15-23
	8.0 Security Requirements	II-15-24
	9.0 Action Plan	II-15-24
	10.0 Security Design	II-15-24
	11.0 Additional Comments	II-15-24
	Section C: Security Test Plan and Report	II-15-25
	Security Test Plan	II-15-26
	Security Test Report	II-15-29
	Section D: Security Risk Assessment	II-15-31
	Security Risk Assessment Template/Guidelines	II-15-32
	Section E: Security Design	II-15-34
	Security Design Template/Guidelines	II-15-35
	Section F: Security Features User's Guide	II-15-37
	Security Features User's Guide Template/Guidelines	II-15-38
	Section G: Trusted Facility Manual	II-15-41
	1.0 Introduction	II-15-42
	2.0 System Security Overview	II-15-42
	3.0 Security Administrator Commands, Calls and Functions	II-15-42
	4.0 Warnings of Vulnerabilities	II-15-43

Continued on next page

Part III - Document Templates and Guidelines, Continued

Volume II	Section H: Disaster Recovery/Contingency Plan	II-15-44
Chapter 15	1.0 Description	II-15-46
(continued)	2.0 Users	II-15-46
	3.0 Resources	II-15-47
	4.0 Sensitivities	II-15-48
	5.0 Actions	II-15-49
	6.0 Instructions	II-15-49
	Section I: Contingency Plan Test Report	II-15-50
	Contingency Plan Test Report Template/Guidelines	II-15-51
	Section J: Certification and Accreditation Statements	II-15-52
	Security Certification Statement	II-15-54
	Security Accreditation Statement	II-15-55

Volume II
Chapter 16

Development Documentation

Section A: Deliverable Overviews	II-16-2
Section B: Program Documents	II-16-3
System Design	II-16-4
Program Source Code	II-16-8
Section C: Documentation for Others	II-16-12
Operator's Manual	II-16-13
User Documentation	II-16-16
Turnover Package	II-16-20
Test Cases Sample Format	II-16-21
STARS Screen Examples	II-16-23
Section D: Design and Programming Checklists	II-16-25
Design Checklist	II-16-26
Programming Checklist	II-16-27
Documentation Checklist	II-16-28

Continued on next page

Part III - Document Templates and Guidelines, Continued

Volumes I & II	Process and Control Documents	I-17-1
Chapter 17		
	Section A: SDLC & Process Improvement Recommendation (SPIR) Form	I-17-2
	Section B: Functional Impact Areas Checklist	I-17-3
	Section C: COTS Product Evaluation Criteria	I-17-6
	Requirements Evaluation	I-17-7
	Cost Evaluation	I-17-9
	Technical Evaluation	I-17-11
	Vendor Evaluation	I-17-13
	Integrator Evaluation	I-17-14
	Section D: Software Process Summary Questionnaires	I-17-15
	Lessons Learned/Postmortem Questions	I-17-16
	New Project Planning Questions	I-17-20
	Section E: Guidelines for Specific Core Project Metrics	I-17-23
	Milestone Performance	I-17-24
	Milestone Percent Complete	I-17-27
	Progress Indicators	I-17-29
	Effort Indicator	I-17-32
	Staffing Indicator	I-17-34
	Product and Size Stability	I-17-36
	Functional Size and Stability	I-17-38
	Product Quality Indicators	I-17-41
	Charting Technique Summary	I-17-44
	Sample Schedule Checklist	I-17-46
	Section F: Quality Assurance Checklists	I-17-50
	Audit Checklists	I-17-51
	Inspection Checklists	I-17-55
	SDLC Phase Completion Checklists	I-17-69

Part IV - Glossaries and References

Volumes I & II
Appendix A

Terms Used In This Handbook

Section A: Acronyms	I-A-2
Section B: Glossary	I-A-13
